

Preferred Oral Nutritional Supplements (ONS) for Adults

- Products listed below in **green** can be initiated in primary care after '**MUST**' screening & appropriate first line '**Food First**' treatment in line with '**Six Steps to Prescribing ONS**'.
- The products on this list have been evaluated as the most cost-effective prescribing choices
- The products listed in **blue** overleaf should only be prescribed following assessment/ recommendation by a dietitian.
- Initially prescribe an **ONS starter pack** or **one week's supply** in a variety of flavours to help people identify their preferred flavours.
- Prescribe a minimum of 600kcal/day initially (usually 2 servings, prescribe between meals)
- Prescribe ONS as **acute** NOT repeat prescriptions.
- ONS prescriptions should be reviewed every 3 months as a minimum. If patients fail to engage or do not attend two consecutive ONS reviews the ONS prescription should be stopped and the patient informed.

1st Line Powdered ONS

Prescribe standard versions if individual can drink 2 x 200ml servings per day and is **able to prepare milkshakes from powder** (or has support who could prepare the drinks).
If a lower volume is required prescribe **compact** versions.

Product name	Serving Size	Kcal/serve	Protein/ Serve (g)	Flavours	Additional information	Monthly volume to prescribe	Ambient IDDSI Level
AYMES Shake	57g	388*	19*	Ba, Ch, G, Ne, S, V	Requires mixing from powder with 200ml milk, starter pack available	3192g (56 x 57g)	0
