

## Prescribing Clinical Network

<b>Policy Statement</b>	<b>Renavit in renal dialysis</b>
<b>Policy No:</b>	PCN 92-2014
<b>Date of Issue</b>	5 <sup>th</sup> March 2014
<b>Review Date:</b>	<p style="text-align: center;">March 2016</p> <p style="text-align: center;"><i>(Unless new published evidence becomes available before this date OR there is new published national guidance e.g. NICE)</i></p>
<p><b>Recommendations:</b></p> <p>The PCN supports treatment with Renavit for patients requiring vitamin supplementation during renal dialysis and consider it as AMBER* on the traffic light system – suitable for initiation in renal units and continuation by the patients' GP</p>	
<p><b>Key Considerations:</b></p> <ul style="list-style-type: none"> <li>• Renavit is a licensed vitamin supplement which is proposed to replace the current unlicensed product, Diallyvit.</li> <li>• Diallyvit is now considered as BLACK on the traffic light system</li> <li>• Renavit is of lower cost than the unlicensed alternative</li> <li>• Renavit can be stored at room temperature.</li> <li>• Epsom &amp; St Helier, Brighton and East Kent renal units are all in support of this change</li> </ul>	
<b>Date taken to Prescribing Clinical Network</b>	5 <sup>th</sup> March 2014
<b>Agreed by PCN members</b>
